

METS2010 – events and review

Tom Schnackenberg – Tue 16th Nov

Donald MacVicar – Tue 16th Nov

Jason Ker – Wed 17th Nov 2010

THANK YOU!

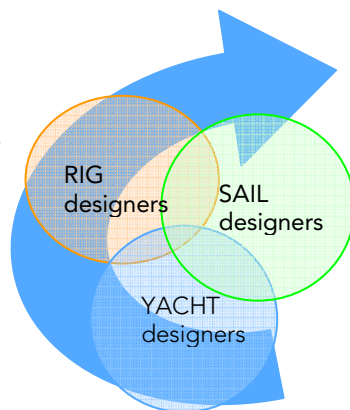

METS2010 was a great success

SMAR Azure THANKS ALL those who visited our stand and attended our open talks.

Special thanks to our speakers: **Andy Cloughton, Tom Schnackenberg, Donald MacVicar, Jason Ker and Clay Oliver** for discussing the challenge faced by modern design teams.

All speakers enthused the audience with personal stories about team collaboration and communication.

More than 50 people attended our open talks on **Brio – the collaborative software platform for sail-rig-yacht designers.**

A lively debate sparked among attendees...

...is Brio the solution to communication and data management problems in racing design teams?

Finally we would like to thank the Wolfson Unit for their collaborative effort and contribution to the development of Brio.

Thank YOU,

Sabrina, Alessandro and Donald

PRODUCT NEWS

BRIO: the collaborative project management software for Yacht, Rig and Sail designers. Brio connects designers with powerful analysis, design and performance tools

AzureProject: a new version with advanced analysis results

RigEdge: the rig design tool that takes into account sail loads.

SA Evolution: the revolutionary technology to optimize fiber layouts
