AzureProject – v.4 highlights

- Icon based designed work-flow:
 - Speeds up sail design
- Enhanced Sail Structural analysis:
 - Quicker solver
 - More accurate results
- Flying sail shape analysis - it is now possible to extract mold shape data from flying sail-shapes and compare them with the design mold shape.

RigEdge – v.2 highlights

At BOOT, a new version of RigEdge will be unveiled. It includes the ability to carry out the following analysis:

- Buckling
- Dynamic Loads
- **Rotating Mast**
- Gaff Rig

A light version of RigEdge will also be unveiled
