

Brand new AzureProject
Version 5.0 PREVIEW

AzureProject is now at its version 5, bringing major enhancements to increase efficiency and productivity

Some of the new fiber layout tools are:

- Using the **fiber layout library** is now very easy: you can import a fibre layout from any sail and AzureProject fits it onto the new sail
- **Straight paths option**
- **Total Membrane Weight Calculator:** it provides the total weight, including Fiber, Scrim, Glue and Film.

AzureProject: FIRST, UNIQUE & FULLY INTEGRATED Sail Design & Optimization software

FIRST: the development of the *AzureProject started in 1997*, when Sabrina began her doctoral research at Glasgow University (UK). Since her Ph.D. award in 2001, SMAR Azure has continuously been developing AzureProject. The software is now used world-wide by sail designers/makers, sail-cloth makers.

FULLY INTEGRATED: AzureProject is *entirely developed by SMAR Azure*. We do not use someone else technology, and that is the reason of the *highest level of integration*. Furthermore, our tools are integrated in a seamless way with our rig design software. **No third party involved!!!**

UNIQUE: Since inception, SMAR Azure has worked in close relationships with sail, rig, yacht designers to produce design software applications tailored to their individual needs. It includes: *design of any type of sail + fiber layout + optimization (aero + structural + aero-elastic analysis!!)*

USER-FRIENDLY: AzureProject, notwithstanding the highest level of complexity of the mathematic and science used in all areas (sail surface generation, analysis of the mutual interaction between sail and wind), it is still *with no dispute the MOST User-Friendly tool available*.

NEW Img2Des allows the user to measure a flying sail shape from any digital image of a sail and then create the design file in AzureProject directly!

SailDesigner.net
The forum for the modern Sailmaker

SailDesigner Forum is a global forum for sailmakers and suppliers to discuss software, hardware, materials & machinery etc. On the forum, you can also share/discuss your AzureProject design files. To know more please click on: www.saildesigner.net

AzureProject -License options

- **PERPETUAL** license - it includes 12 months of free Maintenance and Support service
- **ANNUAL** license - it includes 12 months of free Maintenance & Support services and the option to become perpetual, if renewed for 2 more years.
- **PAY AS YOU DESIGN (PAYD)** - ONLY for AzureDesign – it is an annual license including 20 credits to produce sails.
