

METS 2023: Embracing Maritime Innovation Together

Our experience at METS 2023 was absolutely exhilarating! At booth 01.522, we were at the heart of maritime innovation, connecting with passionate minds eager to explore the latest in maritime technology.

It was more than just a showcase; it was a vibrant celebration of innovation. Engaging in insightful discussions, exchanging knowledge, and feeling the fervor for maritime tech was inspiring.

If you have any questions, or you would like to know more about any features, please contact us at support@smar-azure.com

Our joy was amplified by hosting our first in-person AzureProject workshop post-pandemic.

Digging into design tools, fielding burning questions, and fostering connections with our AzureProject family and customers was incredibly rewarding.

To all who journeyed with us visitors and workshop attendees – **THANK YOU!** Your support inspires us to elevate our software and services continually.

As we embark our journeys post-METS, anticipate more captivating updates and innovations from us.
