

AzureProject: preview of the METS2013 new version

At forthcoming METS tradeshow, a brand new version of AzureProject will be launched. Among many, two features to mention:

- Advanced panel viewer dramatically improves the analysis of panels prior the production, so you are in full control of the panel produced
- Analysis results graphs can now be saved directly as pictures to ease the communication with your customer!

Yet the best fiber layout tool used by the majority of string sails manufacturers

The AzureProject fibre layout tool allows designers to be extremely creative. It does not limit the number of fibre groups and is very user-friendly and precise... this is the reason why the majority of string sail manufacturers have chosen AzureProject!

Aim higher with AzureProject!

Using unique, integrated and

powerful simulation tools,

designers can optimise sail performance by simulating the sail's behaviour in all sailing/trimming conditions.

The ultimate result are **smoother and faster sails,** as well as trimming

conditions and corner loads, that designers

can share with the client and mast

manufacturer

Annual or Perpetual License

Beside the traditional PERPETUAL LICENSE option, it is now possible to RENT AzureProject on ANNUAL basis. The annual rental fee includes the Maintenance & Support service too, which means bug fixing, updates of the software and dedicated technical support via Skype/email/phone & e-ticket system. The ANNUAL License option offers important advantages: not only are the Maintenance and Support services included, but moreover, if the annual rent is also renewed for 2 consecutive years, the license will become perpetual!! For more info contact us at sabrina@smar-azure.com

"We beat North, and are happy with the overall package!"

BARRY HAYES, HK

"Azure Project has cut the design and development time by 15%, which is a huge saving in any business."

IAN SHORT, AUS

"Analytical tools are good on two counts, they allow you to compare different cloth manufacturers products against each other, as well as checking the flying shape and I use it a lot with my customers to show them different trimming techniques"
CHRIS OWEN, UK

METS -SuperYacht pavilion No 10.312 19-21 Nov 2013, Amsterdam RAI

SMAR Azure will show-case the latest developments on AzureProject and RigEdge at the forthcoming METS Look for the METS newsletter for our final trade show program. To set-up a meeting with us at METS, please contact Sabrina at sabrina@smar-azure.com

Bringing innovation to the Marine Industry

Since October 2004, when SMAR Azure was incorporated, we committed to continuously enhance our core competencies and technology. We address the future needs via systematic R&D activities to deliver high values to our customers.

SMAR Azure develops, improves and commercialises products and engineering services for the Marine industry. Our product offerings include also:

- **SA-Evolution**, the unique software to design light and faster string sails;
- RigEdge, the unique software tool to aid the design and certification of rigs of any sort. It includes tuning, sailing and dynamic loads.

SMAR Azure also offers **expert professional services**. Our proprietary sail—rig-boat design technology is used in conjunction with MIDAS NFX (FEM/FEA) and advanced CFD-Ranse by our team of engineers for the design and aerodynamic, structural and aero-elastic analysis of sailing yachts and their components

THANK YOU for your continued attention & trust,
Sabrina, Alessandro, Donald
